HG2156

Trailer

- 3PMSF marking
- M+S** marking
- Long-distance transport
- Local transport
- Construction site
- 5.000 kg load
- FRT** marking

Technical updates

- The **improvement of the casing structure** through optimized materials in the steel belt leads to increased resistance
- The steel cords in the **bead bundle** and the **bead filler** have also been **reinforced**, which increases performance, especially under tough conditions.
- Production with a reduced carbon footprint
- Regroovable and retreadable twice
- Recyclable material structure
- 5t load capacity, 164J load/speed
